E.Stonji

Particles

Jens Döring is a man of many talents. Since 1999 the musician and artist has recorded, produced and remixed under a variety of monikers such as E:gum , Jerry Lusion and Hp.stonji but it is as E.stonji, his electronic solo project, that he will release his first album for Kitty Yo Digital called 'Particles'. Effortlessly combining breakbeats with idm structures and ambient grooves, his discography has included countless CD/LP/12" releases for labels such as Digital, Skam, Klein and Phantomnoise among many others. In addition *Döring* works as a radio play director and producer for the German audio book publishers while also working as a sound and media artist making video and audio installations. *E.stonji's* music oscillates between abstract breaks and dance-driven beats, he performs his live sets with his drummer Matthias Freund and they nicely blur the lines between the urban dancefloor and the nerdy disco.
