### **nq - purple skies**

the german sound and netartist *nq* aka *nils quak* has just finished his third longplayer *purple skies* which will be released at *kitty-yo digital* on june 1st 2007. after several albums and eps for netprojects and labels such as *progressive form*, *i can't break you break records*, *tonatom*, *retinascan* und *kyo records* nq is now taking the next logical step with the new full album release. *purple skies* features 11 new tracks and 50 minutes of contemporary electronica filled with hypnotic breaks, far away melodies, minimal structures, clicks'n'cuts aesthetics and dusty bits of sweet emotion. nq creates a quiet and yet powerful idea of electronic music for places apart from urban clubs and modern architecture.

nq is also part of the international *stfu* network und festival. in august 2007 *kitty-yo digital* will release an remix ep featuring various reworks of tracks from *purple skies*. further infos will be posted soon at [www.kitty-yo.com](http://www.kitty-yo.com).
